Professional Summary

Full Stack Software Engineer specializing in modern frontend ecosystems, scalable backend microservices, and AI-driven development. Proficient in React, Next.js, TypeScript, and Rust/WASM, backed by scalable backend pipelines (Python/FastAPI, Node.js, PostgreSQL, Redis). Expert in Model Context Protocol (MCP), multi-agent AI orchestration, sub-50ms Time-to-Interactive (TTI), and zero-trust web architectures.

Professional Experience

LNJ Corporate Solutions Indore, India
Lead Full Stack & Infrastructure Engineer Dec 2025 - Present

- **Enterprise Search & Web Dashboard:** Designed and deployed a full-stack document search portal over 350+ GB (700,000+ files) using React, Next.js, and an asynchronous Python indexing backend, reducing query latency by 85%.
- **API Engineering & Microservices:** Developed high-throughput REST APIs and WebSocket streams interfacing with TrueNAS REST services and containerized workloads, achieving sub-40ms response times for concurrent users.
- **Zero-Trust Web Security:** Spearheaded Cloudflare Access (mTLS) and Tailscale auth layers across internal web applications, securing 100% of admin dashboards and endpoints from unauthorized WAN access.
- **AI-Augmented CI/CD Pipelines:** Automated GitHub Actions pipelines utilizing AI-assisted verification workflows for automated linting, test suites, and zero-downtime Docker deployments on Proxmox hypervisors.

Projects

GradeWise | AI-Powered Academic Grading Platform (*Next.js, React, Tailwind, Genkit, GCP*) 2025 - 2026

- Architected and deployed a production full-stack web application for automated academic grading, featuring responsive teacher dashboards, secure file uploads, and real-time AI feedback generation.
- Implemented asynchronous processing pipelines using Next.js Server Actions and Google Cloud Genkit to extract rubric criteria, calculate similarity scores, and stream structured evaluation results in real-time.

High-Performance WASM Web Platform (*Rust, Leptos, WebAssembly, Cloudflare Workers*) 2026

- Built a responsive client-side WebAssembly web application in Rust and Leptos, achieving sub-50ms Time-to-Interactive (TTI) and a 100/100 Lighthouse performance score with zero runtime JavaScript overhead.
- Deployed globally across Cloudflare edge workers, utilizing Durable Objects for persistent real-time state coordination.

Medical AI Suite & Clinical Trial Decision Portal (*Python, FastAPI, Streamlit, LangGraph, Groq*) 2026

- Constructed a full-stack healthcare platform parsing unstructured clinical trial records via LangGraph and Groq (Llama 3.1) to autonomously match patient profiles against the ClinicalTrials.gov API in under 3 seconds.
- Built automated data ingestion pipelines structuring 10,000+ character medical reports into validated biomarker JSON datasets.

Technical Skills

Frontend Development: React.js, Next.js (App Router, Server Actions), TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Rust/WebAssembly (Leptos), Responsive UI/UX Design.

Backend & APIs: Python (FastAPI, Flask), Node.js, Express.js, RESTful APIs, WebSockets, gRPC, Asynchronous Programming, Microservices Architecture.

AI Engineering & Tooling: Model Context Protocol (MCP), Multi-Agent AI Orchestration, LangGraph, LangChain, Self-Hosted LLMs (Groq, Ollama), Google Genkit.

Databases & DevOps: PostgreSQL, MongoDB (Atlas), Supabase, Redis (Caching), SQLite, Docker, Kubernetes, Cloudflare Workers, AWS, GCP, CI/CD (GitHub Actions), Linux (Nginx).

Certifications & Accreditations

Cloud & Database: Oracle Cloud (OCI) Foundations Associate | MongoDB Node.js Developer Path

AI & Full-Stack Engineering: DeepLearning.AI – LangChain for LLM Development | Postman API Fundamentals Student Expert

Education

Vellore Institute of Technology (VIT) Bhopal, India
Bachelor of Technology in Computer Science and Engineering 2022 - 2026
